Semiconductor Manufacturing: Acknowledgements

Pollution prevention in the semiconductor industry offers viable reductions in the use of raw materials, toxics, chemicals, energy, and water, as well as the wastes, emissions, effluents, and pollution resulting semiconductor manufacturing processes and facility operations.

The author of this topic hub extends special thanks to all of the contributors who helped make this document technically accurate and a credible resource.

Industry Contributors

Environmental Health & Safety Department
Intel Corporation
Hillsboro, Oregon

Production and Operations
ON Semiconductor
Pocatello, Idaho and Gresham, Oregon

Technical Reviewers

Environmental Health & Safety Department
Intel Corporation
Hillsboro, Oregon

David Livengood
Toxics Use/Hazardous Waste Reduction Coordinator
Oregon Department of Environmental Quality
Phone: 503-229-5181

Rick Volpel
Oregon Deparment of Environmental Quality
