

Supplier Feedback Request Form
for
Supplier Products Containing
DecaBrominated Diphenyl Ether (DecaBDE)
Requested by [Company Name]

[Company Name] pledges to encourage and support our product and material suppliers in efforts to eliminate the use of the toxic fire retardant, Decabrominated Diphenyl Ether (DecaBDE) in their products and the products sold to [Company Name].

In order to phase out DecaBDE fire retardants in our boats and marine products, [Company Name] must identify every supplied material containing DecaBDE. As a supplier to [Company Name], please complete the following two action items.

1. Review the accompanying fact sheets:

- DecaBDE Overview (Fact Sheet #1)
- PBDE – Current Legislation (Fact Sheet #2); and,
- DecaBDE Uses and Alternatives (Fact Sheet #3).

2. Complete the Supplier Feedback Form (See Page 2 of this document) to the best of your knowledge. Because DecaBDEs are widely used in a variety of plastics, textiles, and other products, and we are in the initial investigation of which products may contain DecaBDE, we are requesting only very basic information on this simple feedback form (See Page 2).

In Part 1, list materials known to contain DecaBDE. In Part 2, list materials that MAY contain DecaBDE, based on types of items listed in the fact sheet titled “DecaBDE Uses and Alternatives.” Whenever possible, include the type of resin (PVC, epoxy, polyurethane foam, etc.) or fiber makeup (cotton, polyester, etc.).

Return the completed Supplier Feedback Form by [insert date] via fax to:

[Company name]
