

Welcome to the Webinar brought to you by:

Pacific Northwest  
Pollution Prevention  
Resource Center

2009 January 22

**Making a Difference for the Planet and Your Bottom Line with U.S. EPA Climate Partnership Programs**

- Attendees will not be able to speak to the presenter or to other attendees;
- Questions should be submitted using the “question” box located in your panel anytime during the course of the presentation. At the conclusion of the presentation the presenters will answer questions.
- When submitting your question, please include the name of your organization. [i.e., Arizona DEQ – Will this presentation be available online?] Your name will automatically appear on the organizer’s screen, but not your organization.
- Can’t get through the telephone line? Call technical support at 1-800-263-6317 (press 2) or wait a couple of minutes and try again.

***Special Thanks To: The Air and Waste Management Association (A&WMA) for their assistance in advertising this event to its membership.***

# Benefits for Switching to Biodiesel as your Fuel

- Saves costs if fuel is made from waste grease rather than from virgin oils
- Reduces your carbon footprint by emitting up to 80% less green house gases than petrodiesel
- Protects your workers, because Biodiesel is less toxic than petroleum-diesel
- Saves time and money for fleets since it does not require retrofits like CNG
- Provides extra lubrication and extends life of engines
