

P2 and ESG (Panel and interactive discussion)

Environmental, social, and corporate governance (ESG) is an international phenomenon. Speakers provide examples of ESG and engagement from a small business perspective. Discussion will include how P2 measures compare to ESG standards.

Rebalance

E A R T H

WHO WE ARE

Rebalance Earth is a global ecosystems services platform for valuing and funding a living nature to combat climate change, protect biodiversity and lift communities out of poverty.

WHAT WE DO

Offer businesses a way to “employ” the ecosystem services provided by keystone species, such as forest elephants, to produce carbon offsets, enrich the biodiversity and support the livelihood of local communities.

HOW WE DO IT

Use bank grade blockchain technology to safely transfer funding into projects that support UN Sustainable Development Goals; underpinned by verified data that confirms the continued protection of known individuals of keystone species.

SUPPORTING UNITED NATIONS SDGs

P2 and the ESG Phenomenon

Donna Walden (Greenup) – Introductions/Opening Comments – 5 min

Jacklyn Beebe, Khan, Litwin, Renza (KLR) Accountants – 20 min

Define Environmental, Social, Governance (ESG) and what it means for businesses and non-profit organizations.

Anca Enache, 3P Impact consulting – 15 min

Use real life examples to explore the ESG engagement from a small business perspective.

John Katz (EPA R9) will facilitate open/interactive session – 20 min

How easy is it to engage with ESG? Is there any guidance out there? Is the effort worthwhile?

Goals of Session:

- Define Environmental, Social, Governance (ESG) and give audience a working knowledge of how to utilize ESG in their P2 programs
- Provide real life examples of ESG engagement
- Explore in a facilitated discussion:
 - Can P2 measurements outcomes measure up to the type of standards that public companies are being held accountable to for ESG?
 - Would getting on the ESG bandwagon encourage greater movement by companies towards EPA's strategic and environmental goals? What would that look like?
 - Is the effort worthwhile? How do we go about it?
- Our goal is to equip the attendees with more insights on ESG and a better understanding of its applicability.

Thank You
